Using a Hoover Web Design Template with Front Page
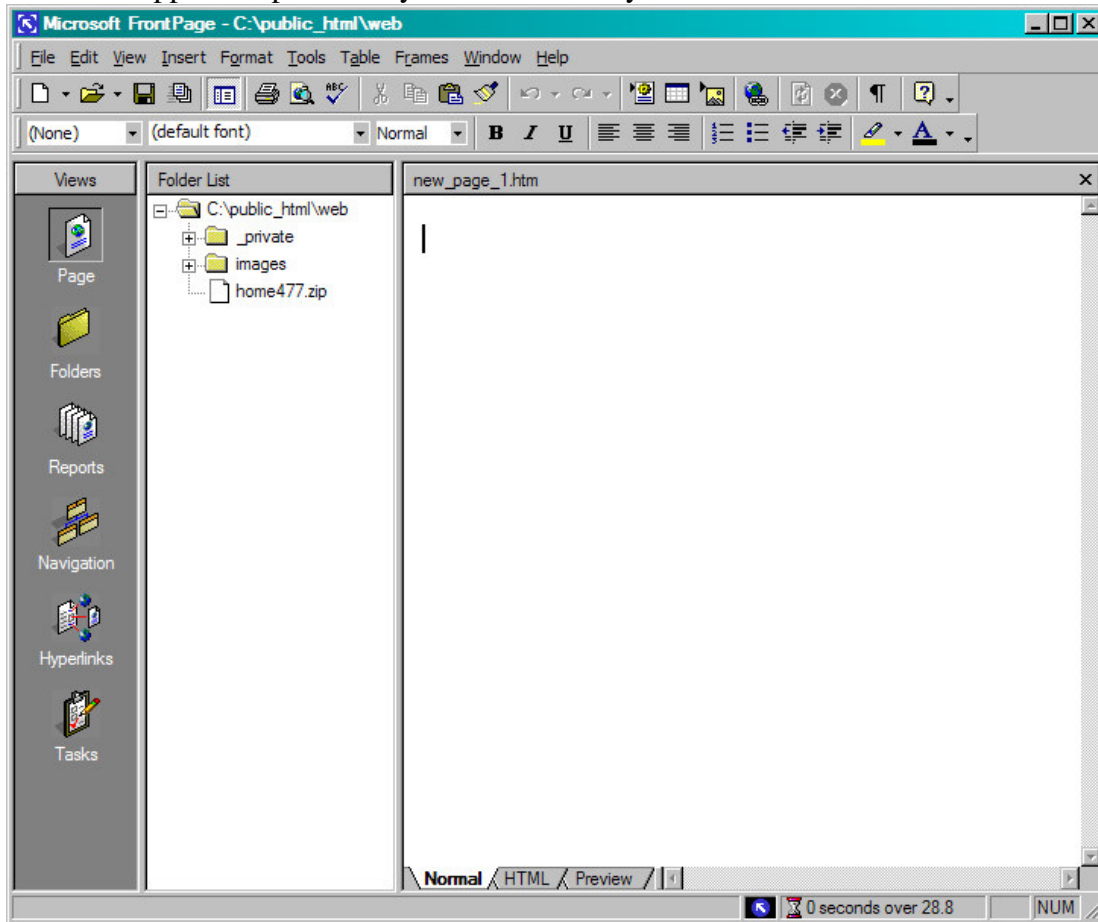

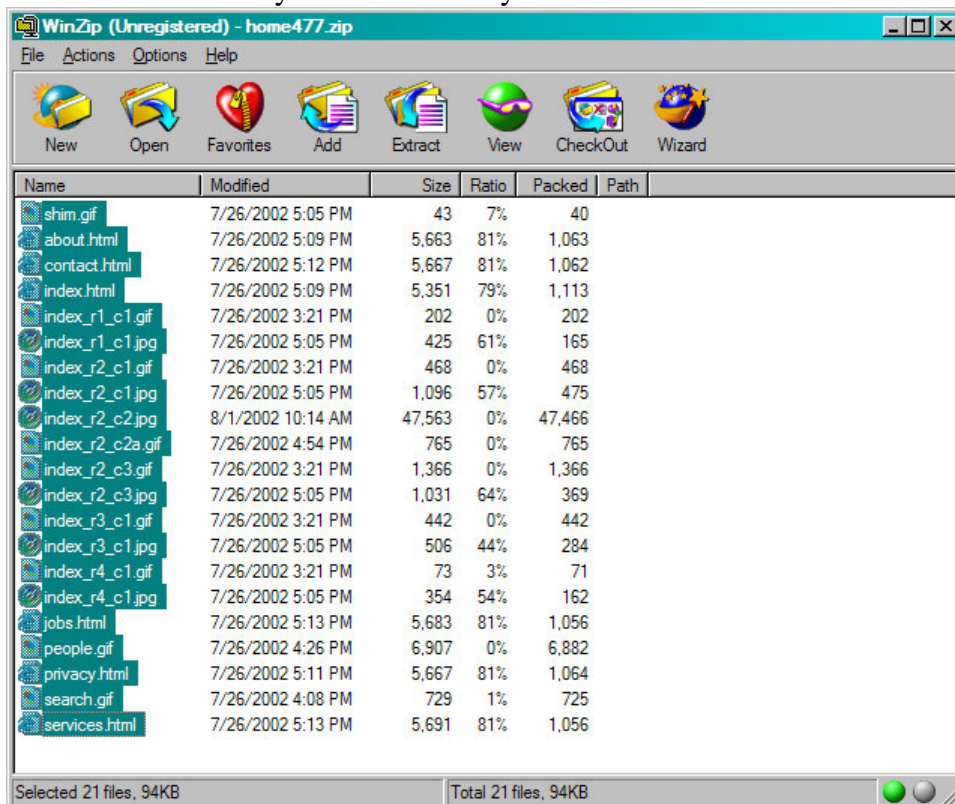

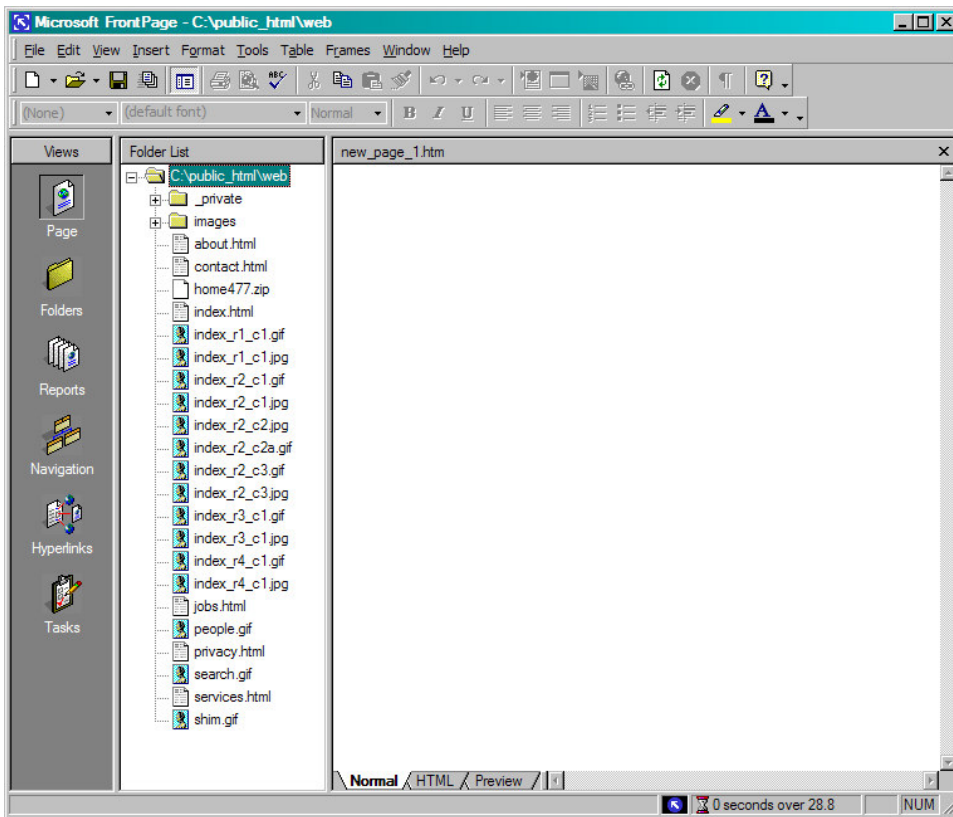

Place the zipped template into your web directory.

Extract the files into your web directory.

Hit F5 when back in Front Page to refresh your file view.

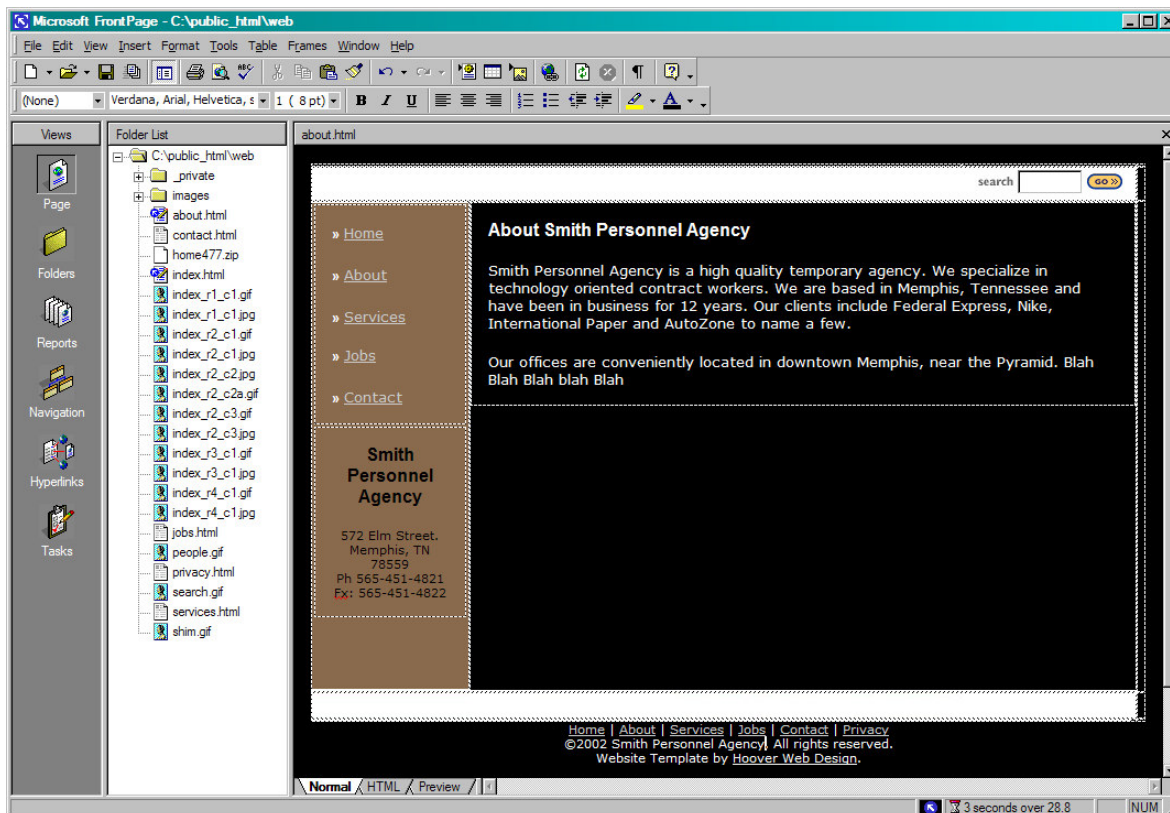

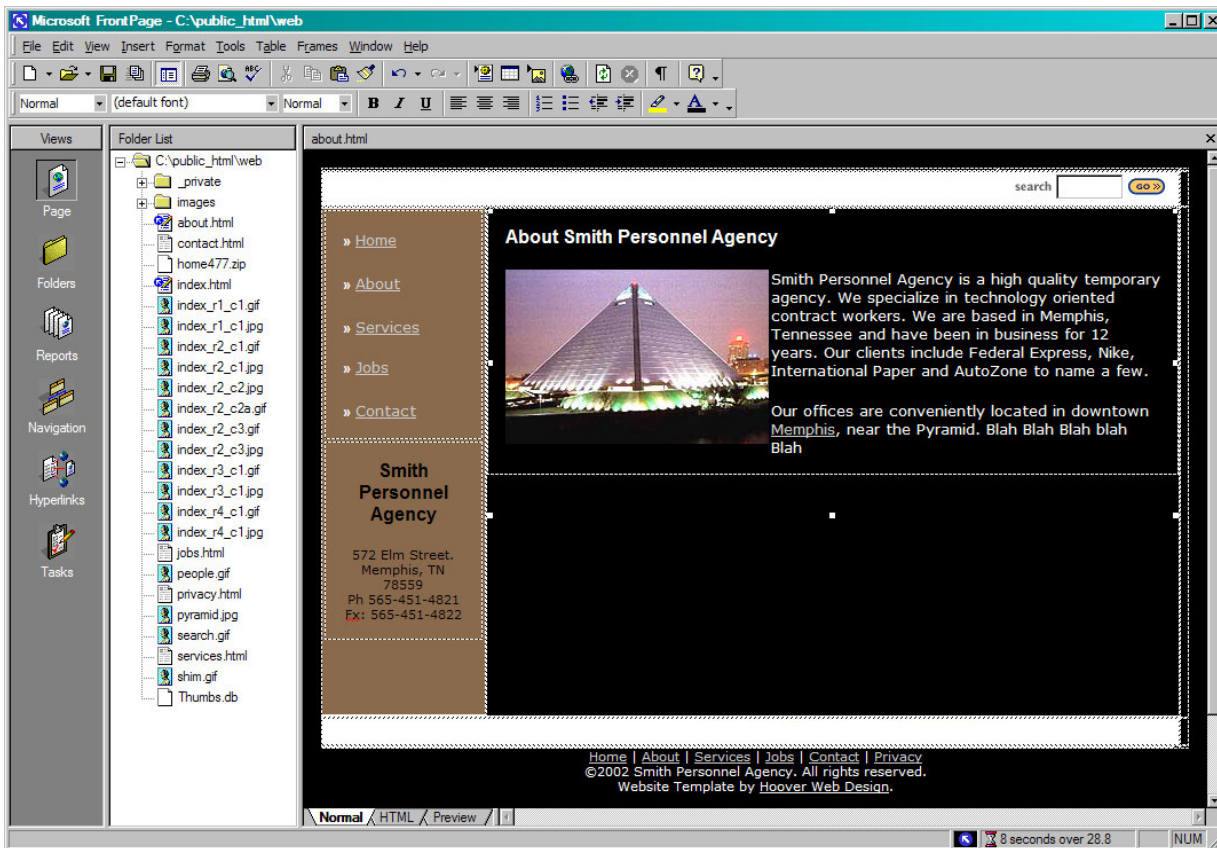

Double click index.html to select that page to edit.

Begin replacing the dummy text with text that applies to your web site.

Save your Work. Double click on a content page...for example about.html Replace the dummy text with text that applies to your web site.

If you need to add links or photos, you can do so.

Update each content page this same way.

When you are finished updating all of your content pages, publish to the web in the same manner that you normally do.
